

Q12

```
public class Animal {
    String name;
    public Animal (String name) {
        this.name = name;
    }
    public void makeSound () {
        System.out.println (name + " has
        no am thanh ...");
    }
}
```

```
public class Pig extends Animal {
    public Pig (String name) {
        super (name);
    }
    @Override
    public void makeSound () {
        System.out.println (name + " Rou
        (hau hau hau...)");
    }
}
```
